

S.S. Hp Trolley

Code 3468

Description

This trolley has been specially designed to produce detergent foam for industrial cleaning, keeping in mind the reliability, easy-to-use, ergonomic and safety.

It comes totally in stainless steel, with antimark rubber wheels, manual hose reel (20 mts blue hose), foam and wash lances, special injector, and other facilities to get a complete high pressure cleaning unit.

The original shape and the position of the main components remove the possibility to overturn the trolley and make it extremely stable while the operator pulls the hose.

The trolley can be supplied with two different injectors (codes 3311 and 3468).

All these version are equipped with a s.s. needle valve, for detergent calibration.

Main features

Foaming unit & by-pass	supplied	Air injector in s.s. box
Manual hose reel	supplied	s.s. AISI 304
Blue hose	supplied	20 mts.-R1-3/8
Gun with swivel fitting 3/8	supplied	50 lt/1'-280 bar-160° C.
Quick couplings	supplied	s.s. AISI 304-3/8G.
Foam lance	supplied	s.s. AISI 304-400mm.
Rinse lance	supplied	s.s. AISI 304-600 mm.
Frame		s.s. AISI 304
Front wheels		antimark rubber D.100
Back wheels with brake		antimark rubber D.150
Valve for product calibration		s.s. AISI 304 (lockable)
Weight		50 kgs.
Weight on delivery		60 kgs.
Size packed (cm.)		105x74x105h
