

Trolley 2P

Cod. 3072

Description

This special trolley has been designed to carry up two canisters and two equipments, i.e. Ulragel Injector or Microfoam and Microsan for sanification.

The trolley (for two equipment), is composed of the following different S.S frames:

- the vertical one must be connected to the water mains (3 to 8 bar) by the ball valve to supply water to the equipments. Also two hose holders are installed.

- The horizontal frame must be connected to the compressed air supply (5 to 8 bar); the necessary quick couplers (in/out) are already installed. This frame is also equipped with four rotating S.S. Wheels with grey antimark rubber.

The frames will be assembled together and properly fixed by the supplied S.S. Bolts.

The trolley code. 3072 is provided with two hose holders, and two equipments can be installed.

On specific request a trolley with one hose holder code 3071, for one equipment, can be supplied.

Main features

Frame	s.s. pipe D. 30 x 1,5 AISI 304
Equipment mounting plate	30 x 50 cm.
Vertical frame:	water connection ball valve 1/2" G water outputs 2 x 3/8" G
Horizontal frame:	air connection quick coupling 3/8" G Air output 1 x quick coupling (hose D. 6x8)
Water / Air inlet pressure	8 bar max
Base for canisters (max 2 Pcs)	30 x 30 cm.
Hose holder	2 - max 30 mts hose x 1/2
Lance holder	2
Maximum load	400 kg
Front wheels / Back wheels	rotating antimark grey rubber
Net weight (without equipments)	13 kg
Size	cm. 90 x 40 x 90 (H)
