

SanyMan Code 3310

Description

SANYMAN is a simple and reliable system to atomize disinfectant agents on the hands of operators in Food Industry.

The connection to the air line is necessary to operate this unit; the red button can be pressed by leg or knee to obtain an immediate nebulization of the disinfectant agent on the operator's hands.

The extractable s.s. nozzle allows its quick replacement or cleaning operation.

SANYMAN comes with the bottle holder and fitting units for the pushbutton.
