

Programmer E

Code 3843

Description

This microprocessor controller allows to program electric or pneumatic pumps to dose chemicals in washing machines, tanks, canisters etc.

The microprocessor contains 3 different programs with the following functions:

- AUTO "time based" dosage in order to keep the concentration within the required range.
- SLAVE this function requires to connect the unit to an external N.O. contact (voltage free) to dose the amount of product set in the program.
- SHOT the operator can activate the pump by a front button to dose the set amount of product in tank, bucket, etc.

All functions can be changed from the keyboard.

Main features

Voltage supply	24Vac/dc
Electrical input (no load)	2VA max.
Output	2 x 24Vdc
Electrical load	24W max
Plastic box	rated IP65
Interlock	N.O. (volt free)
Low level switch	N.O. (volt free)
Alarm output	relay N.O. (volt free)
Initial Charge	front button
Size	140 x 120 x 210h
Weight	1,5 kgs.
