

Blender P

Cod. 3439

Description

This unit must be installed on a vertical wall, and allows to automatically dilute any neat disinfectant/detergent product, delivering the ready-to-use solution directly to the bucket, bottle, canister.

The connection to tap water is necessary, and the minimum required pressure is about 2 bar. The concentration can be set by an orifice plate, available in 15 sizes (one installed and others available on request).

The operator only needs to open the valve and the solution flows through the supplied delivery hose.

Main features

Neat products	1
Water pressure (dynamic)min.	2 bar
Water delivery	about 8 lts/1'
Max. concentration	about 30%
Check valve	S.S. 3/8"
Height above floor	2 mts. Max.
Water inlet	F 3/8" GAS
Weight	1,5 kgs.
