

Blender SS

Code 3440

Description

To dilute detergent/sanitizing products, this unit has been designed for the simple connection to low pressure tap water . It is totally made of stainless steel

The min. required pressure is 2 bar, in dynamic conditions; the special injector, designed for low pressures, produces the necessary vacuum for mixing products with water.

The operator simply open the water valve and the solution flows to the bottle.

The concentration can be fixed by the stainless steel needle valve.

Main features

<i>Neat product</i>	1
<i>Low pressure injector</i>	S.S.
<i>Water pressure</i>	2-5 bar
<i>Water delivery</i>	8 lts/min
<i>Concentration</i>	Max 30%
<i>Weight</i>	1,5 kgs
<i>Height above floor</i>	2 mt Max
<i>Water inlet</i>	F 3/8" GAS
